

JEAN-PHILIPPE GAUTHIER

jpgauthier.me | contact@jpgauthier.me | 1 (819) 434-1521

Passionate and result-driven software developer/manager with experience in building innovative products leveraging machine learning. Recognized for turning ideas into high quality products.

EXPERIENCE

IVADO Labs

2024-present

Team Lead

Technical lead for end-to-end delivery of applied AI products, including data pipelines, feature engineering, model training, evaluation, optimization, deployment, integrations to other systems and user interfaces

Lead teams of developers, data scientists, designers and delivery managers

Delivered projects across hospitality, healthcare, retail and aeronautics

Technologies: Python | GenAI (LLMs) | Gradient Boosting | OR-Tools | React

Zuva | spin-off of Kira Systems

2021-2024

Principal Software Developer

Technical lead on multiple AI products: contract negotiation, no-code model training, sell-side diligence tool, lease abstraction and admin panel

Led and mentored a team of developers, establishing best practices for code quality, testing and delivery

Technologies: Go | Typescript | GraphQL | React | Postgres | Temporal | Argo

Kira Systems | acquired by Litera

Staff Software Developer

2021

Created a unit within the company to build a product targeting a new vertical

Led a small team of developers, a designer and a product manager

Architected and developed a fully-functional alpha version of a product

Development Lead

2017-2021

Led a team of developers in designing and implementing major features such as document similarity, transitioning to online learning and customizable charts

Grew the development team from a couple of individuals to multiple teams

The company grew from 20 to around 250

Software Developer

2016-2017

Implemented a new Document Viewer leading to a publication

Led the transition from Om to Reagent while building a new component library

Technologies: Clojure (script) | Java | Postgres | RabbitMQ | Docker | Kubernetes

University of Waterloo
